

Dear Hiring Manager,

I will graduate this coming May with a degree in computer science, and my journey to this moment has been anything but conventional. As the first in my family to pursue a career in technology, I've navigated uncharted territory—overcoming challenges, breaking barriers, and finding my place in a field that constantly inspires me. This path has shaped not only my technical skills but also my resilience and curiosity.

I have a solid understanding of CS fundamentals and data structures along with experience in Java, Python and C++. Furthermore, I have experience as an intern and a hackathon win. I have also completed many projects using fullstack development. My desire to learn new technologies and explore different areas in computer science is shown by my constant effort outside the classroom through active participation in hackathons, educational programs, courses, and projects.

I am excited to apply to Alloy's fullstack engineering role. I am available for interviews on Fridays and weekends. Thank you for considering my application.

Sincerely,  
Maryam Kurbanova
